SECOND ST. AT SALMON, PORTLAND, ORE.

INFORMATION

PRICES for the fall 1927—spring 1928 season are covered by this List No. 27, which cancels all former catalogs. Net f. o. b. Portland or nursery shipping station. Remittance with order unless terms are previously arranged.

LOCATION—City display and sales grounds and office, 220 Second Street, corner Salmon, phone Atwater 1927. Nurseries at Durham, Oregon Electric Railway, 11 miles south. By auto from Portland, out Sixth Street, Terwilliger Boulevard and Newberg Highway, about 8 miles to Red Rock Cheese Factory, turn to left and keep straight ahead about 3 miles. Visitors welcome at the nurseries and display grounds.

CALIFORNIA BRANCH—Demand for our hardy stock has grown to such extent that an agency branch was necessary, and we have established display and sales grounds on Main Highway, 16 miles south of San Francisco, three miles north of Burlingame, Post Office address, J. B. PILKINGTON, Nurseryman, MILLBRAE, CALIF.

A large supply of select specimen Evergreens (Conifers), Broad Leaf and Deciduous Flowering Shrubs, Shade Trees, Vines and Plants are ready at all seasons and personal inspection and selection are earnestly solicited.

PLANTING SEASON—Usually from late October to early April, right through the winter, depending of course upon weather. Early planting is advisable—at any rate, place orders early so that selections made be reserved for delivery or shipment at any time desired.

GUARANTEE—We have been in the nursery business in Portland for 40 years. All plants shall be true to name, well grown and properly dug and packed and delivered to the transportation company in good order, after which our responsibility ceases. We assume no responsibility for failure due to after conditions over which we have no control. In case any plant through error prove untrue to name, we will replace without charge or refund not more than the original purchase price.

LANDSCAPE DEPARTMENT—Fully equipped and under trained and competent management, will make complete plans and specifications for the landscape operations of small or large estates. Simple planting suggestions for home grounds are made without charge, but where landscape problems require special visits, plans, specifications and draughting, study and so on, a reasonable charge must be made, consistent with the time and services rendered. We will be glad to go fully into detail with those who are interested in this.

BUILDING DONE—RESIDENCE EAST 23RD AND MARKET

BROAD LEAVED EVERGREEN TREES AND SHRUBS

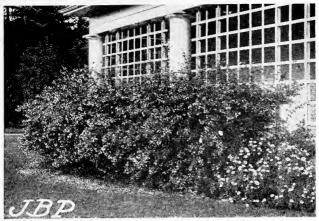

The great beauty of the broad leaved evergreens, makes them most valuable for gardening purposes. Many are among our most spectacular and gorgeous flowering shrubs, while their broad, attractive leaves show out most effectively during the parts of the year when many trees and plants are without foliage. There is practically no end to the charming results that can be obtained by the liberal use of this class of plants, either as single specimens or in masses as well as both background and foreground—for the somber winter picture or the summer floral display. They generally thrive in shady or partially shaded places, giving finest foliage effects when so grown—with better flowers perhaps when grown in the sun.

Our climatic conditions in the Pacific Northwest are particularly congenial to this class of shrubbery and aid in obtaining wonderfully pleasing effects in foliage and flowers. Our Oregon State Flower, Oregon Grape (Mahonia Aquifolium) and the state of Washington's choice of the native Rhododendron prove conclusively the esteem in which they are held. My stock of these is particularly fine, home grown, thoroughly acclimated, and good results can be depended upon.

COTONEASTER HORIZONTALIS BORDERING STEPS, ENGLISH LAUREL ABOVE

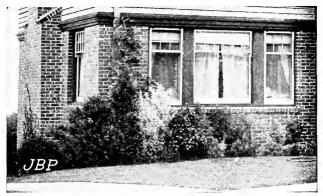

Cotoneaster—

As a family, they cannot be overestimated, furnishing variety of foliage and habit that makes them favorites in landscape planting. Not entirely evergreen, they are so persistent in foliage that they are commonly classed as such All flower pinkish white in spring, but their main beauty is in the masses of red or orange red berries carried through fall and winter. Simonsii or Shining Leaf is upright, tall, orange red berries, fine for background. Franchetti is tall but graceful drooping habit, fine foliage, usually evergreen with masses of berries. Horizontalis is very hardy, flat or creeping growth, drops its foliage but loads up with red berries making bright color spots in winter. Microphylla is more tender, but evergreen small leaves, dark and glossy, spreading drooping habit making it fine for tops of walls, banks, etc.

IRIS AND SHRUBBERY BORDERED POOL, A PORTLAND ESTATE

BASE PLANTING-"TYING THE HOUSE TO THE GROUND"

Daphne Odora, pink flowered, medium \$2.50, large \$4.00.

The sweetest flower of all, in clusters of little trumpet shaped florets, light pink inside and carmine pink outside, coming in late winter and early spring. Growth is compact and heavy, attains good size, with rich glossy evergreen foliage, usually with narrow marginal white stripe.

Erica-Heather-Heath-

We only grow the Ericas or Heather and Heath varieties that have proven hardy and satisfactory here. Successful Landscape Architects are using them more and more. They are helpful in many ways in making effective gardens.

RESIDENCE IN GRANTS PASS—NOTE THE PLANTING ARRANGEMENT

Laurus (Prunus) Laurels and Laurustinus-

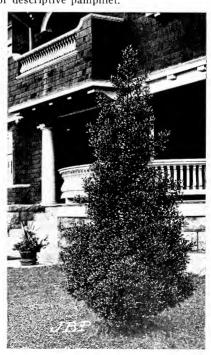

Well enough known in the Pacific Northwest to omit description. Large growing shrubs with glossy, everygreen foliage useful as specimens, in masses and for evergreen hedges. Laurustinus "Winter Flowering Laurel" blooms in late winter, large umbels of pink and white flowers especially welcome at that season. The others are more valued for foliage than flowers.

ENGLISH HOLLY

Specimen at 11th and Schuyler Sts. A most satisfactory specimen tree, always attractive for its waxy, evergreen foliage and bright red berries during the Fall and Winter. Also makes excellent thick evergreen hedge.

Also profitable when planted for commercial purposes. The demand during Xmas Holidays for the cut branches, with their beautiful waxy leaves intermingled with brilliant crimson berries, is always hard to supply, even at good prices.

STER BORDERING STEPS, LAUREL AGAINST FOUNDATIONS COTONEASTER

PRUNING OF TREES AND SHRUBS

Deciduous trees and shrubs should be given a severe cutting-back or pruning when transplanted. More or less roots are always bruised and broken during transplanting, and all such should be trimmed off with pruning shears or a sharp knife, as the bark cannot heal over a rough wound. In order to insure a strong and healthy growth, as well as to cause the plant to become bushy or attain any desired shape, it is well to cut off from each branch one-third to one-half of the previous summer's growth. Fruit trees respond especially to free pruning at the time of trans-

planting.

The matter of when and how to prune established shrubs and trees depends upon their habits and the purpose for which the operation is performed. Shrubs that bloom early which the operation is periorined. Since that broom early in the spring form their flower-buds during the preceding summer, and they should, therefore, not be pruned until immediately after flowering, if their flowering is to be preserved. Late-blooming shrubs flower on wood of the same season's growth, and should be pruned while dormant, in late winter or very early spring. One-third the previous season's growth may be removed. Shrubs planted in masses should be pruned regularly to induce a dense growth, and to prevent individual plants from becoming too tall, with unsightly, open branches.

The shearing or trimming of hedges should never be done later than July 1, as late cutting allows a tender new growth, which does not have time to ripen properly and consequently is liable to winter-kill. The shearing of individual shrubs to form flat topped, globe, pyramidal, or other

avoided.

ON GRAPE—OUR STATE FLOWER—HARDY F GREEN—USEFUL AS SPECIMENS, IN MASSES OR IN HEDGES OREGON

Ligustrum, Evergreen Privet-

Lucidum or Shining Leaved Privet is one of the attractive evergreen shrubs. Good size, upright spreading habit, exceptionally fine leathery, dark rich green foliage, miniature lilac-like flowers in June and followed by long upright racemes of dark purplish black berries carried

1.50 .60 .60

A medium size shrub, open graceful habit, evergreen A mendal size sirub, open graceral habit, evergreen bright, light green foliage in summer, taking on high autumnal colors and fading back to green in spring, valuable for specimens and masses, and charming when intermingled as a foil or contrast with the heavier and more somber leaved evergreens like Laurel or Rhododendron.

Oregon Grape, Mahonia Aquifolia—

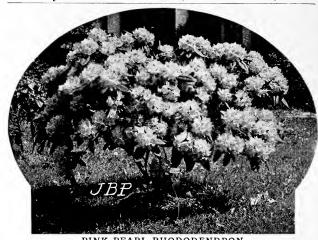

Mahonia, Oregon Grape15-18Mahonia, Oregon Grape18-24Mahonia, Oregon Grape24-30 1.00 1.50

Oregon Grape is deservedly growing in use not only locally, but east of the mountains where it proves entirely hardy, and in California and elsewhere. We can say here that "if the woods were not full of it, the yards would be" for exotics are too often preferred to worthy natives. Rich in foliage both summer and winter, they flower bright yellow in spring and bear an abundance of attractive bluish-black berries in summer and fall. Remember they are entirely hardy and plant more of them, as well as other Berberis. 1.00 Photinia Serrulata, larger size \$1.50......12-18 1.00 2.00

Rhododendron Ponticum......12-18, \$2.00 18-24 2.50

Stranvesia, Undulata. New (see illustration)..18-24 1.50

Discovered in Central China in 1910—a welcome addition to our broad leaf evergreens, grows 3 to 5 feet high, "wavy" or spreading habit, bright glossy dark green foliage in spring and summer, turning deep reds and brown in fall, small spikes of attractive white flowers in spring and bears orange red fruit sparingly in summer.

A GRACEFUL DROOPING HIMALAYAN CEDAR

CONIFERS—EVERGREEN TREES

These are largely used as specimen lawn trees, in pairs to mark walks and entrances, for massing, windbreaks, screens, hedges and as backgrounds for planting flowering shrubs and trees, and of late years for foundation plantings around house or buildings especially at corners. Many associate the word "evergreens" with simply cedar or our native fir trees without realizing the diversity of color and form which can be had in these, ranging from every shade of green and blue foliage to garnet and yellow, golden, silver and white tipped, giving even summer tints to the desolate winter landscape.

Always dug with ball of earth and burlapped. We transplant and root prune them frequently, which practically insures successful transplanting, even of the larger specimens of which we have a limited number of large size specimens from 4 to 8 feet high in Abies, Cicilica, Concolor and Nordmanniana; Lawson's Cypress; White, Englemann's, Norway and Colorado Blue Spruces, and will gladly make special quotation upon any in which you may be interested.

Abies (Firs)—

A class of rapid growing trees of extreme hardiness and thriving in exposed situations. They are of great decorative value but need plenty of space for their best development.

DECIDUOUS ORNAMENTAL TREES

The following list of deciduous trees (those that lose their leaves in autumn) embraces a selection for all purposes. For street planting, the Norway Maple probably leads in general suitability, with several other varieties of Maples, Elms, Birches, Horse Chestnuts, Tulips, Mountain Ash and others, all favorites; while for lawn and park planting this varied list covers trees of every characteristic in outline and habit, color of foliage and floral diversity.

These trees have been grown from seedlings in my nursery, have been transplanted each a number of times, according to size, will transplant readily and take vigorous hold and grow well when moved to permanent locations. Prices are for different sized trees, and in all cases good value will be given, according to price charged.

As a street or curb tree, Norway Maple easily holds first choice. Park departments, city foresters and landscape architects unite in giving it first position, as it easily combines the greatest number of desirable qualities, it withstands extremes of drought and excessive moisture, does not lift or break sidewalks or curbs thriving in limited soil, of clean, upright and rather compact growth, not affected by city smoke or gases, and holding its foliage late, then dropping its leaves in a comparatively short space, making labor of cleaning up in the fall of little effort. For a small flowering tree for curb or in lawn Pauls Double Scarlet Hawthorne probably is first favorite.

DECIDUOUS ORNAMENTAL SHRUBS

Flowering shrubs take predominance in all plans for landscape decoration, grounds large or small. Without shrubbery no landscape can be created, but with a careful selection, properly planted, any property can be enhanced in beauty and value. If care is given in selecting, flowers can be had from early spring to late fall. It is my aim to produce everything in flowering shrubbery that is useful, hardy, and worthy of cultivation in this climate. I have been bringing in, trying out and rejecting different shrubs for many years past, adding to my list only those of proven merit in the Pacific Northwest. My stock is large, well grown, every plant being bushy and well furnished in proportion to its height and with exceptionally fine root system. Where no sizes are quoted, prices are for large, well grown shrubs, that will give immediate effect and flower the first year after planting.

Aralia, Hercules Club—strong plants	1.00

Azaleas are the most showy and gorgeous of dwarf and medium growth shrubs, effective when planted with other shrubs, they are even more so when massed. The Southern Oregon is our finest native shrub, growing to large size in time, flowering in large clusters, white or light rose, fragrant in late May. The Evergreen Crimson, which we introduced years ago from Japan, and which we propagate in quantity since the federal embargo stopped importations, is dwarf in habit, light delicate glossy foliage in spring and bright purplish garnet in winter, flowering dazzling crimson in spring. Azalea Alta-Clarence has large foliage, deciduous, taking on wonderful autumnal colors, and masses of bright yellow flowers in spring.

LAWN GRASS SEED

We are sole retail distributors for Oregon for the genuine Cocoos Creeping Bent, introduced by Mr. Lyman Carrier, renowned Agronomist. The lawn at our Durham nursery was remade with Peat Moss and this Grass Seed, using three pounds of seed to one thousand square feet. See the lawn and judge for yourself, color, uniformity, springiness. See lawn of Mr. L. G. Woerner, 28th and Alameda, also the greens at Portland Air Port, Columbia and Riverside Golf Clubs. We also supply Winter Blue Grass (Poa Bulbosa) at same price.

The Hydrangeas are among the most satisfactory shrubs, the Hortensia type are very showy in late spring and early summer, thrive in shade or on north side of house. Hydrangea Paniculata graniflora "Peegee," either tree form or bush, flowers from mid-July until early fall, first creamy white and fades to deep pink. The Oak-Leaved flowers also, but is especially valuable for its rich autumnal foliage.

CHINESE TRUMPET VINE, WHITE JASMINE Both in full bloom when photographed August 20, Boston Ivy on chimney

HARDY VINES AND CLIMBERS

The need of vines and creepers for home embellishment is well known, as nothing adds more grace and beauty to the exterior of the house than well-placed and appropriate vines. They cover porches and pergolas, give shade, comfort, perfume and flowers. A porch without a vine always appears desolate and incomplete. Also invaluable for converting offensive looking fences or other unsightly features into things of beauty. In shaded places and beneath old trees where grass will not grow they are often used as a ground cover. On steep slopes and banks they prevent erosion. Churches, depots, factories, outbuildings and all brick and stone edifices can be covered by clinging vines, without trellis work, that will relieve their harshness or lack of architectural beauty and make them things of beauty and joy forever.

joy forever.

Strong-growing, free-flowering climbers. I hey are hardy and ornamental, but require deep, rich soils and the occasional use of fertilizers, to obtain best results. When well established, a greater abundance of the lovely flowers can be had by rather severe pruning, cutting back the lateral shoots to short spurs and heading back the leaders conveniently, taking care, however, not to over-do it. The grafted Japanese varieties are strongly recommended as superior to the seedlings.

The new Pink Wistaria was grafted with scions of a fine bright pink, long full panicles, from a notable Pasadena garden. We are propagating it locally and have strong thrifty plants for this season.

The planting of trees and shrubbery is not an expense for they enhance real estate values, which makes their purchase a safe and sure investment.

Peat Moss (Torf Mull)—Humus in available form, the greatest of soil conditioners. We are Oregon Distributors of G. P. M. brand, imported from Europe, cheapest and best on the market. Ask for descriptive pamphlet and price list.

EVERGREEN PRIVET HEDGE IN NORTH PORTLAND

HEDGE PLANTS AND LIVE FENCES

The garden craftsman, if he is a true artist, will let Nature make his fences. Old dead walls and stiff fences are becoming obsolete among people of good taste. Anyone who has seen a rightly kept hedge of Privet, English Laurel, Oregon Grape, Holly or Roses, knows what an important feature it is in making truly beautiful grounds.

For medium-sized formal hedges the Privet is probably

the most satisfactory—a good grower, responds readily to the pruning knife; is the most economical in cost, perfectly hardy, and practically an evergreen with us. English Laurel and Lawson's Cypress are also fine for formal sheared hedges. For the high hedges, screens or windbreaks, Norway Spruce, Lawson Cypress and the Hemlock are all desirable; the Norway Spruce especially being sturdy, fast-growing and very handsome. These conifers are best pruned

or sheared just as new growth starts in spring.
For the untrimmed hedges—those allowed to grow naturally with but little or no pruning, and which in many localities are now a favorite means of enclosing flower and wegetable gardens, edging terraces and defining roads and walks, covering unsightly defensive barb wire or picket fences—nearly any free-growing shrub can be used, such as Spireas, Van Houttes or Thunbergi, Oregon Grape, Abelia, English Laurel, Laurustinus, Cotoneasters and many others.

SHRUBBERY MASSES AT FOUNDATIONS—BOSTON IVY ON WALLS

PERENNIALS AND HARDY FLOWERS

Beautiful, hardy plants, that will flower year after year without replanting each spring or fall, are growing into popular favor, and the so-called "old-fashioned garden" is to be

found everywhere.

The pleasures from a garden of such flowers planted by itself or especially when grouped in front of or among taller growing, hardy permanent shrubbery, cannot be fully described; caring for them is a change and relaxation. They require no skilled or heavy labor, and repay gloriously the attention bestowed upon them.

The following list covers plants that have proven satisfactory in the Northwest. My aim is to supply the best quality of strong, field-grown stock that will give immediate

results.

Fall is the best time for planting Peonies, Japanese Lilies, Iris, etc., though they, and all perennials, can be planted any time until late spring, but best results are to be had from early planting.

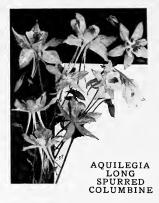

Strong, Field Grown Clumps that give satisfaction.

MADAM CAROLINE TESTOUT ROSES ON PORTLAND STREET

ROSES

Strong Field Grown Two-Year-Old Plants That Give Results

Abbreviations used in descriptions are: H. P., Hybrid Perpetual—vigorous, hardy, flowering in Spring and Fall; require less care and attention than other classes. H. T., Hybrid Tea—more vigorous in growth, free flowering, fine colors; the most satisfactory class for the Pacific Northwest. T., Tea or Everblooming—less vigorous, more tender, finest of flowers. Poly., Polyanthus—fine class of small flowered climbers or pillar roses. Noi., Noisette—rather tender climbers, flowers usually in clusters. G. M., Gold Medal—the Highest Award of Merit given by the National Rose Society of England. Pert, Pernet—Ducher Austrian Briar Hybrids.

These plants are large for mailing unless cut back, though they can be sent this way if desired, in which case add 10 cents for single plants for postage; 20 cents for six, and 30 cents per dozen, in Oregon and Washington, points more distant pay a little more. We pack securely for shipment by express anywhere without extra charge, purchaser paying express charges, which are very light on

nursery stock of all kinds.

Brief Cultural Instructions

PLANTING.—If the situation be not too much exposed where the Roses are to be set out, we prefer fall planting for all hardy kinds. Dormant plants set out in the spring should be planted early, for no plant suffers more from being set out late than the Rose. The plants should be put in friable, rich soil, and firmly pressed in with the foot, taking care not to bruise the roots. Budded roses should be planted sufficiently deep, so that the junction of the bud with the stock is from two to three inches below the surface of the earth. We cannot too forcibly direct attention to the

above rule.

PRUNING.—This operation is best performed during March. Most Roses do better if moderately pruned; some sorts require two-thirds of the past year's growth removed; for others to remove one-half or one-third is sufficient. All must be more or less pruned when planted; do not neglect this. As a general rule, the more vigorous the variety the less it should be pruned. All weak or decayed wood should be entirely cut out, and also any shoots that crowd the plant, and prevent free entrance of light and air. Besides spring pruning, many kinds Hybrid Perpetuals require to be pruned as soon as their first blooming is over, in order to induce a free display of flowers in autumn.

UPRICHARD BETTY

IMPERIAL POTENTATE

PROTECTION.—All Roses would be better for a light covering. This may be done by hilling up with earth; or better, by strewing leaves or straw lightly over the plants and securing them with evergreen branches, oftentimes the

and securing them with evergreen branches, ortenances the latter are in themselves sufficient.

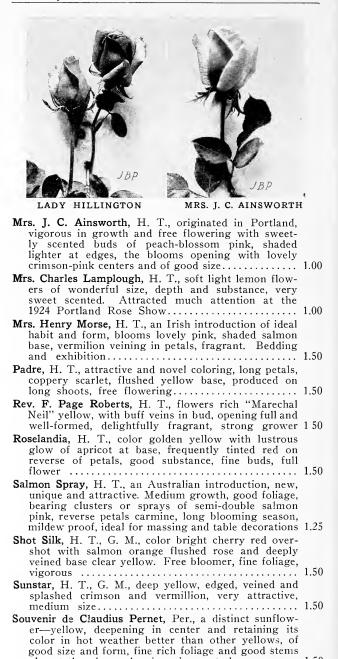

INSECTS.—If proper attention is paid to soil, planting, watering, etc., and a few simple directions heeded, you will not often be greatly troubled. The aphis is among the most annoying foes, and particularly infests plants in houses; healthy plants in the garden are but little liable to its attacks. They can be exterminated by dusting the plants with tobacco dust while they are wet with dew, or by spraying with water in which tobacco stems or leaves have been steeped.

DISTANCE FOR PLANTING.—Distances apart for planting roses are regulated somewhat by the varieties used. Hybrid Perpetuals, Hybrid Teas and other strong growing kinds may be set three feet apart, and Teas from two to two and one-half feet apart. In planting several varieties in one bed, the stronger growing kinds should be placed in the center, or if in borders, they should be set back of the

weaker growing kinds.

Late Introductions — Novelties

	Lacn
Angele Pernet, H. T., awarded Gold Medal, Bagatelle, 1924, one of the most striking novelties; color vivid orange yellow shaded fiery deep reddish apricot, "tango color" covers it. Good grower, long buds that open to medium full, fragrant flower

FRUITS

The list of Fruit Trees we offer is carefully selected, for commercial and Home Orchard planting. We aim to grow the best varieties of each species and have eliminated as far as possible the undesirable kinds, for we wish our patrons to feel sure that they can be sure of obtaining varieties of proven merit. We are growers of general nursery stock and not merely dealers. Our soil is a loam that produces an exceptionally good fibrous root system that insures success in transplanting. Grown right, handled properly, sold direct with no agent's commission. The planter gets the benefit.

BOOKS

We carry the following selected works for the convenience of our customers. Will cheerfully refund the price of any book that is not satisfactory if returned in good condition within one week.

The Amateur's Guide to Landscape Gardening

48-page booklet on general landscape design of benefit to any owner interested in improving and beautifying home grounds. I for 20 cents in stamps. Mailed

Johnson's Gardener's Dictionary

Complete and up to date, covers the whole field of horticulture and floriculture in 923 pages, giving short cultural and propagation hints. Price \$6.50, by mail \$6.75. We recommend this.

Practical Landscape Gardening Robert Cridland Are You Planning

to plant a few trees, shrubs, or hedge?
 to construct a walk, drive, pergola or garden columns; a pretty garden seat or rustic house; fountain, lily pond, swimming pool or bird

Do You Want to Know

-how deep and where to plant the trees, shrubs, porch base plants?
-which flowers to use in your garden and borders?
-how to construct your walks and drives, Summer house, arches and

pools?

-how to attain this or that effect, and make your home surroundings beautiful?

Then You Need This Book-Because:

It tells how to plant the 20 ft. plot, as well as the larger estate. It gives detailed sketches showing where to plant your flower garden, rose, wild or rock garden; lawns, borders, etc.

It has planting plans telling exactly what varieties to plant for best

effects.

It contains photographs of actual homes, showing the effect of different plantings, the correct and incorrect method, etc.

It will be the means of beautifying your home grounds far beyond

your own expectations.

Get this book. It will save you hundreds of dollars of needless expense and much time and thought, because it is written by a land-scape architect of national reputation, who tells facts that are worth

money.

Handsomely cloth bound. 276 pages. Contains 91 photographs, 67 sketches and 33 plans, 19 of which are planting plans. Diagrams of plots from 40x100 feet are given. Price: \$2.50 (by mail \$2.65).
